

Workshop 1 Concepts + Practices I

Re:Furn

description Charrette

specs Timed collaborative greeting. The point of this exercise is to hit the ground collaboratively running. By playing with a "design your life" approach that is ubiquitously familiar and that students can easily relate to, beginning graphic design students have fun working with their peers in their first informal design experience.

- 1) Divide class into groups of 6.
- 2) Find any area to work within the building.
- 3) Rearrange furniture in a provocative, unexpected way.
- 4) Name your creation and explain what it is/does.
(Make up a story)

due 7 minutes
